

WHAT IS CLAIMED IS:

1. A composition comprising of about 70 to 45% by weight of a copolymer of about 95 to 90% by weight of tetrafluoroethylene and about 5 to 10% by weight of perfluoro(alkyl vinyl ether) and about 30 to 55% by weight of polytetrafluoroethylene, wherein said copolymer has a melt flow rate of about 0.1 to 1.7g/10 min at $372\pm 1^{\circ}\text{C}$ and said polytetrafluoroethylene has a melt flow rate of not less than about 1g/10 min at $372\pm 1^{\circ}\text{C}$.
2. The composition of claim 1, wherein said perfluoro(alkyl vinyl ether) is perfluoro(ethyl vinyl ether).
3. The composition of claim 1, wherein said polytetrafluoroethylene has a melt flow rate at least about 10 units greater than the melt flow rate of the copolymer.
4. The composition of claim 1, wherein said copolymer and polytetrafluoroethylene are melt mixed.
